MONTHLY FACTSHEET | 30 June 2025

Japan Equity High Conviction (I2) JPY

Investment Objective

Maximise total return over the medium-to-long term by focusing on fundamentals and concentrate investments on stocks that differ significantly between strategy's analysis and market expectations. The target return is the reference benchmark +5%.

This product is actively managed and seeks to achieve mid-to-long term capital growth through investing primarily in equities or equities-related securities issued by Japanese companies. The product is limited to around 30 holdings and aims to generate excess returns in any market environment by utilising a bottom-up investment approach focusing on "Micro Leading Indicators" that are directly linked to corporates' near-term earnings.

For institutional and wholesale investors seeking to participate in the capital market. The Sub-Fund is therefore suitable for investors who can afford to invest their capital over the longer term
